Project Selection Guide

Youth develop these life skills while having fun through learning in a selected project from three core subject areas:

- Core I-Animal Sciences
- Core II-Environmental Sciences
- Core III-Human Sciences

Each project level can be completed over a three-year period or at the learning pace of the 4-Her. The manuals for the project levels are self-directed and investigative, providing opportunities for families to participate in cooperative learning activities to complete the booklets. Level one is for youth beginning in the project and may be juniors (8-10 years), level two is for intermediates (11-13 years) and level three is for the advanced youth, seniors (14-18 years).

Maryland 4-H brings the University of Maryland into the lives of children and families in their own communities. Through volunteer-directed educational programs, 4-Hers:

- Practice decision making
- Acquire knowledge
- Accept responsibility
- Develop creative thinking
- Communicate
- Understand themselves
- Get along with others
