Creating an Evergreen Wreath

Ginny Rosenkranz
Extension Educator Commercial Horticulture
Soft clip wreath form
Collect evergreen plant materials
Choose what you like!
Make bundles about 2” thick
Place on soft clip wreath form
Clip in!

- The next bundle will go to the right, so that the new greens cover the clip
See how the new bundle covers the clip? The next bundle of greens will be laid on top covering the clip.
And a few more

- Continue to add greens on top of other greens always going in the same direction
Last one in!
Done and Beautiful!
