

Maryland-Delaware Master Logger Directory 2022

The Maryland-Delaware Master Logger Program helps loggers meet the ever-increasing demands of the logging profession. The courses provide information about current environmental regulations, forestry principles, and safe work practices. Becoming a Master Logger publicly demonstrates an understanding of safe, environmentally and economically sound timber harvesting practices. The Maryland-Delaware Master Logger Program also works to raise public awareness of the professionals harvesting trees, one of the region's important renewable resources.

This directory showcases Maryland-Delaware Active Master Loggers, who have completed the 16-hour core training program and have met the program's continuing education requirement of 8 credit hours every two years. When available, the listing includes the counties in which the logger is willing to work.

This directory is an official publication of the University of Maryland Extension Maryland-Delaware Master Logger Program, Master Logger Steering Committee, and the Maryland Sustainable Forestry Initiative Implementation Committee.

For more information about the Maryland-Delaware Master Logger Program, please contact:

Agnes Kedmenecz
Program Coordinator
Maryland-Delaware Master Logger Program
University of Maryland Extension
