Grafting Tomatoes
Saturday, April 5, 2014 — 10:00 a.m. until 1 p.m.
Agriculture Research Building, University of Maryland Eastern Shore

Tomato Grafting...it’s easier than you think. If you grow varieties of tomatoes that are not resistant to air and soil borne diseases, you should attend this workshop. The classroom session will address the history and science of grafting. In the hands-on session at the greenhouse, you will graft plants to take home. The workshop is limited to 20 persons. Preregistration is strongly suggested.

---

Be Smart... Drench Smart...
Small Ruminant Integrated Parasite Management
Saturday, April 12, 2014 — 9:00 a.m. until 4 p.m.
Food Science and Technology Building, University of Maryland Eastern Shore

During the all day workshop, participants will learn about gastrointestinal parasites that badger small ruminants (sheep and goats), anthelmintic resistance and practices to mitigate or manage parasite burdens. The 3 hour morning session will serve as the introduction for the afternoon hands-on training session which will allow participants to get certified on the use of the FAMACHA© score card and learn how to conduct fecal egg count.

---

Growing High Tunnel Spring Crops
Saturday, April 26, 2014 — 10:00 a.m. until 12 p.m.
Pereyra Farm, 6182 Worcester Hwy., Newark, MD 21841

Participants can expect to learn the basics of high tunnel systems to include: site preparation, set-up, pricing, types of crops that can be grown, and financial assistance programs available from USDA.

For more information, contact: University of Maryland Extension at (410) 651-6070 or email: kjparmar@umes.edu or mce@umes.edu. Pre-register online at www.umes.edu/1890-mce.

---

Note: Anyone in need of special services or accommodations in order to participate must call one week in advance.
