Garden Ginger
_Zingiber officinale_

How do I get started?
- Root from cuttings
- Purchase a plant

Where can I grow it?
- Container Gardens
- Indoor Gardens

How do I grow it?
- Part Sun
- Average

How long will it live?
- Evergreen tender perennial—lives outside in warm weather, must keep as a houseplant November through April

How to harvest
- Remove the entire plant from the pot when the root becomes crowded
- Replant a piece of the root, and use the rest for cooking

How to enjoy
- Culinary—use fresh in Asian cooking or to add flavor to tea, dry it and grind into a powder, then use for cooking, make candied ginger
- Decorative—Ginger is an attractive houseplant in a sunny location
