The Maryland Master Gardener Handbook was written to assist anyone who is interested in learning about effective and sustainable horticultural practices.

This handbook is an excellent resource for Master Gardeners, and is also useful as a reference tool at businesses, libraries, nurseries, garden centers, and schools.

The handbook features 28 chapters, 670 pages, over 400 color photos and a Bay-Wise approach to gardening that helps improve the soil, nurture plants, and manage most pests without pesticides.
