

Equine Pasture Management Tips for March

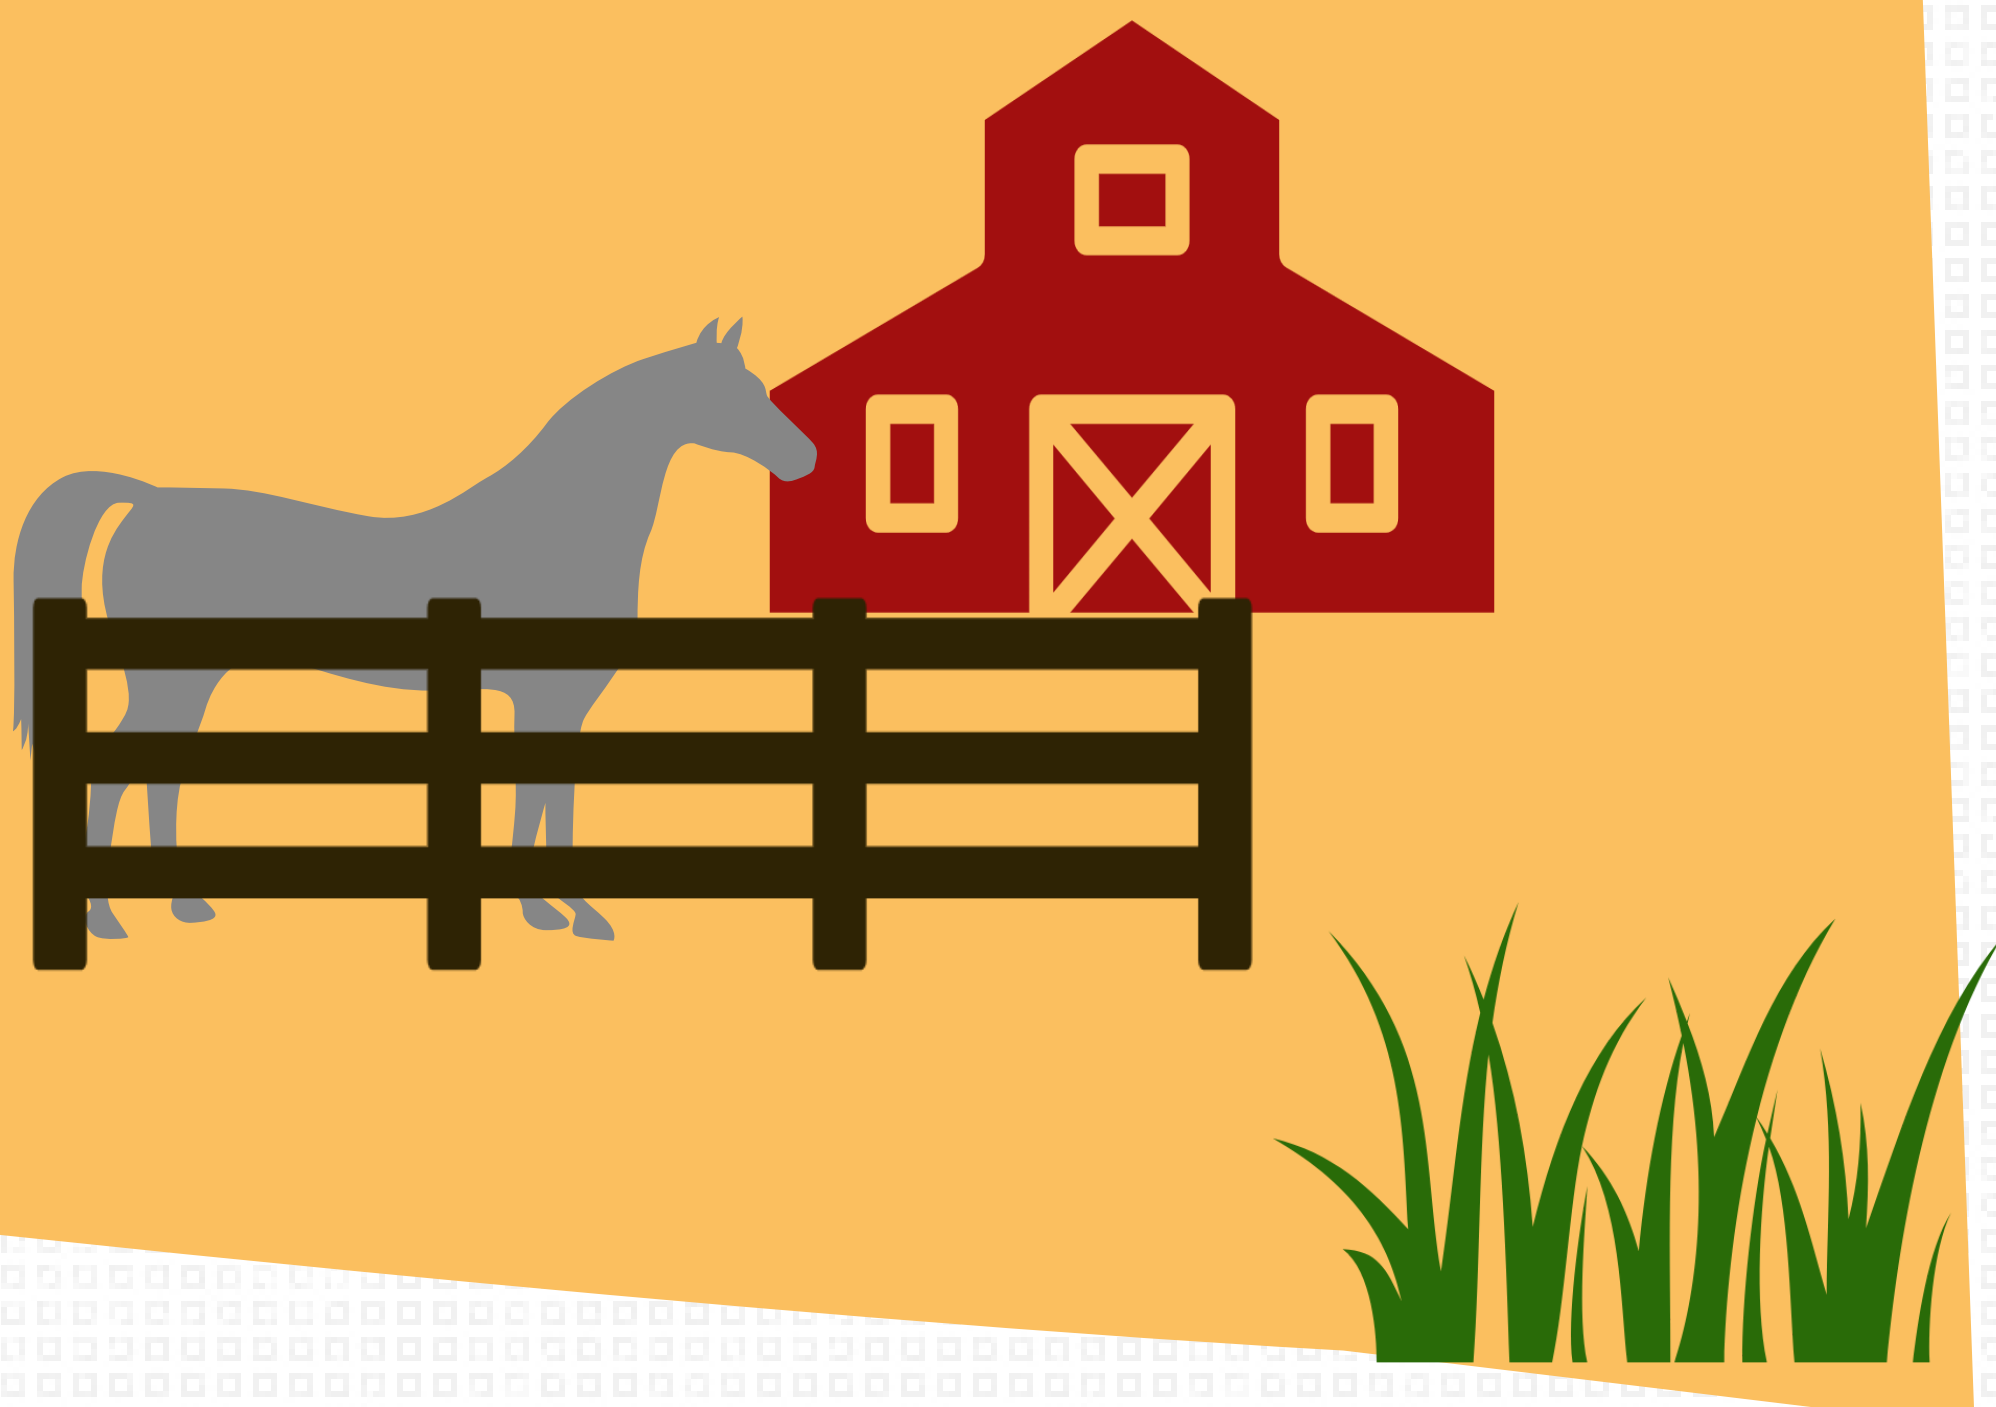

1. Apply Fertilizer

Apply composted manure or 1/3 of the annual fertilizer amount to pastures that aren't currently being grazed making sure to follow soil test recommendations or your farm's nutrient management plan.

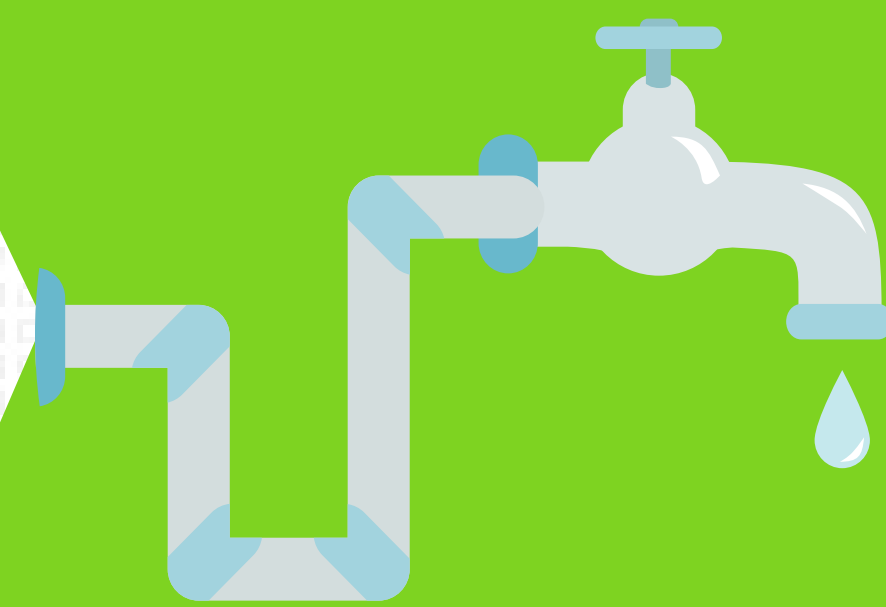

2. Use Loafing Lots

Continue to feed horses hay in loafing lot/heavy use area if pastures are soft and wet.

3. Review Water Management

Check pipes, gutters and drain lines for repair needs. Contact your local soil conservation district for technical assistance with water management issues on your farm.
