Youth Gardening

112,788 plant cuttings of their favorite houseplants to take home and grow on their own landscapes. At least two of the veterans decided to start raised gardens in their community. In Anne Arundel County, MGs help inmates in a correctional facility manage a honey bee colony and harvest fresh honey. In Harford County, MGs in Calvert County helped local churches grow native plants in Maryland and how to incorporate sustainable gardening practices. In Howard County, MGs encouraged the next generation of gardeners to develop their green thumbs! Many of our youth programs taught students the importance of preparing their own healthy, fresh produce.

1,256 MGs in Harford County also worked with special needs adults to help them prepare their own fresh produce. At Perry Point VA Medical Center, MGs helped the hospital install a vegetable garden plot and start a weekly garden club. The MGs in Harford County helped the Perry Point VA Medical Center and conduct 9,547 volunteer hours in therapeutic horticulture projects in 2019!

Certified Professional Horticulturists

Your questions are answered by ME Master Gardener Program and Certified Professional Horticulturists. The UME Master Gardener volunteers at the Edgewood Boys & Girls Green Thumb Club Fall 2019 are seen bottom left. Therapeutic for many different audiences. MGs performed 7,519 volunteer translated materials across the state. Some have formed committees to make their programs more accessible. In Anne Arundel County, MGs help inmates in a correctional facility manage a honey bee colony and harvest fresh honey. In Harford County, MGs in Calvert County helped local churches grow native plants in Maryland and how to incorporate sustainable gardening practices. In Howard County, MGs encouraged the next generation of gardeners to develop their green thumbs!
